

Bobi
– a most
wanted
mailbox
in Finland
for over
30 years.

A design classic, easy for mail carriers, secure and locked for homeowners.

From the start, it was a design classic. **Just the right balance of curves and straight lines to be visually appealing, with the perfect shade of red.** It's easy for mail carriers to use, yet secure and locked for homeowners.

Finnish Banks wanted a stylish, secure, and lockable drop box for payment receipts. Once the box was made, all the bank employees wanted the same box as a mailbox for their homes. Genuine demand, real need, and timeless design laid the foundation for Bobi mailboxes.

Durable, solid, and built to last.

Bobi mailboxes work in **temperatures ranging from -86°F to over +86°F**. Heat, rain, fog, storms – no problem. Its timeless design and durable steel construction mean it's built to last.

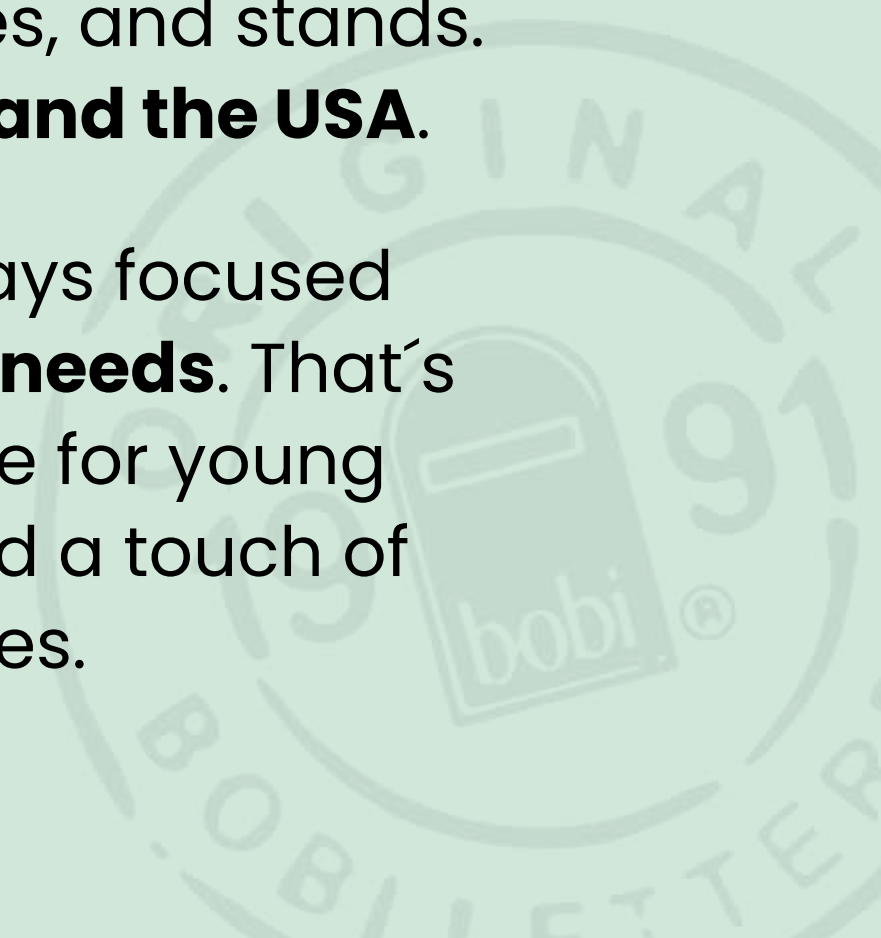

In Finland we have four seasons: winter, spring, summer, and fall. The mailbox must perform in all conditions – otherwise, Finns won't buy it. Many still have their original Bobi mailbox, purchased 30 years ago.

Must-have for anyone looking to add a touch of style and functionality to their homes.

Over the decades, the Bobi collection has grown to include new models, parcel boxes, and stands. Bobi is sold across **Europe, Japan, and the USA.**

Our product development has always focused on innovatively meeting **customer needs**. That's why, Bobi has become a must-have for young and old alike, anyone looking to add a touch of style and functionality to their homes.

**Large parcel
boxes with an
easy-to-use
lock system for
multiple mail
carriers.**

Mail and parcelboxes with **USPS approval.**

Selected products were customized to meet **U.S. Postal Service** (USPS) requirements, and we obtained USPS approval. In addition to mass production, we also produce mailboxes **in any RAL color** for consumers or architects, which is highly appreciated.

Each country has its own color selection – for example, Japan has a completely different color palette compared to Europe and the U.S. In the Netherlands, green is a "must-have" color, inspired by the color of Dutch bridges.
